

2024 IWRMC ANNUAL CONFERENCE

25 – 27 March 2024 | Adelaide, South Australia
Hosted by SA Power Networks

Mission

The **International Wildfire Risk Mitigation Consortium** seeks to establish and facilitate a system of working and networking channels between members of the global utility community to support ongoing sharing of data, information, technology, and practices, and proactively address the wildfire issue through **learning, innovation, analysis, assessment, and collaboration.**

Secure your spot and join us today!

7 Reasons to Join the Conference

CREATE CONNECTIONS

Expand your network and build long-term professional relationships with more than 75 senior utility managers and executives working on various wildfire issues. Learn how their challenges are similar or differ from yours and learn about leading mitigation practices from global utilities.

GET INTERNATIONAL PERSPECTIVES

Join round table conversations about how Australian, Canadian, and US utilities are evolving their wildfire prevention efforts for the safety of their customers and communities.

DISCOVER REGIONAL TECHNOLOGIES

Learn about advanced technologies, such as Rapid Earth Fault Current Limiters (REFCLs), that can reduce the risk of electrical assets igniting bushfires. Query your peers about their technology pilots and evaluation programs to determine applicability in your service territory.

GET HANDS ON WITH SITE VISITS

Participate in technology demonstrations and other site visits with guidance from our host utility – SA Power Networks. See firsthand how other utilities are addressing the unique challenges they face.

EXPAND YOUR KNOWLEDGEBASE

Hear from Subject Matter Experts from the realms of utility operations & protocols, asset management, vegetation management, risk management, data management & governance, and stakeholder engagement & communications.

CHART A COURSE FOR THE INDUSTRY

Work with your peers from leading utilities to establish new opportunities to improve utility wildfire risk mitigation strategies, and develop new ideas for engaging customers, regulators, and other stakeholders in effective ways. Discuss ways to leverage tools, such as the IWRMC Maturity Model, to support our mission to accelerate learning around wildfire risk mitigation.

GET 2 FOR 1 ON YOUR TRAVEL

ENA's Energy Networks Annual Conference will also be held in Adelaide the week before the IWRMC Annual Conference. Comparable to DistribuTECH, the Energy Networks Conference is attended by thousands of utility SMEs and vendors from around Oceania and beyond.

Participating Companies

Mark your calendars for the ENA Energy Networks Conference, taking place just one week prior to the IWRMC 2024 Conference.

Engage in both occasions and be a part of enriching and productive experience.
